

How to Update the Libraries List on Library Books for iPhone

This is the work around solution for updating the libraries list on Library Books for iPhone 1.1.

1. Start Library Books on the iPhone.
2. Go to the **Loans** tab (1).
3. Tap the reload button (2).

4. Library Books will download an updated libraries list. If the update takes more than a second to run you know that it is working. The reload icon changes shape to indicate that it is updating:

5. You can now go to the Settings tab to add your library cards.
6. If you cannot find your library in the list then the update may not have worked. Library Books will only check for an updated list every 24 hours. Uninstall and reinstall the app to reset the counter. Then repeat from step 1.
